

Matt Miles is a Senior Manufacturing Engineer at Unmanned Systems in Pocasset, MA. He is leading the DFMA efforts towards their underwater unmanned vehicles. Matt has been practicing DFMA for 18 years now, and trust me, he's going to tell you all about that today.

Overall, Matt has been in engineering for over 25 years with a background in mechanical engineering. He has held a variety of positions across the product development value stream. He holds a bachelor's degree in Mechanical Engineering Technology and a Master of Science in Product Development, both from the Rochester Institute of Technology. Matt is also a member of Boothroyd Dewhurst's prestigious club of DFMA Supporters of the Year, being awarded the honor in 2009.

Matt lives in Franklin, MA with his wife and daughter. Back in 2008 for Matt's first presentation at the forum, his daughter made him mention their pets in his bio. So, without further adieu, they also live with Stella, their English Bulldog, and Eli, their all white 20 lb. cat.
